Frontier Services

001 DUTCH SIM CARDS

002 LOCAL EU SIM CARDS

003 ROAMING EU SIM CARDS

004 WORLD SIM CARDS

001 DUTCH SIM CARDS

Frontier EU offers several SIM cards that best complement Peplink's connectivity solutions. SIM cards can be used both as a backup or main connectivity solution. By combining providers and countries, if a cellular connection is available, you can always be online in combination with Peplink's Cellular Bonding.

 Dutch SIM cards (postpaid)				
Bundle	Provider	Type	eSIM	Price
Unlimited	Odido	4G/5G	yes	€65
300GB	Odido	4G/5G	yes	€49
Unlimited	Vodafone	4G/5G		€85

002 LOCAL EU SIM CARDS

Benefits

- **Avoid High Roaming Charges:** Roaming SIM cards often come with higher data costs, especially when used across international borders. Local SIM cards typically offer data plans at local rates, which are usually much cheaper.
- **Improved Connectivity:** Local SIM cards connect directly to the native network of the carrier, providing better signal strength, lower latency, and higher data speeds compared to roaming, which relies on intermediary agreements.

Local EU SIM cards without prices					
Country	Bundle	Provider	Type	eSIM	Price
Austria	Unlimited	T-Mobile	4G/5G	yes	€85

003 ROAMING EU SIM CARDS

Benefits

- **Hassle-Free Movement:** Roaming SIM cards eliminate the need to switch SIMs when crossing borders within the EU, ensuring uninterrupted connectivity for devices in transit or deployed across multiple countries.
- **Automatic Network Switching:** Roaming SIMs seamlessly connect to the available networks in each EU country without manual configuration.
